Education

Indian Institute of Information Technology, Nagpur **Aug 2024 – Aug 2028**
Bachelor of Technology in Computer Science Engineering | CGPA: 8.07

Experience

Google Developers Group **Sept 2025 – Present**
Core Team Member

- **Secured** a core membership role by ranking in the top **3%** (3 out of 100+ applicants) during a rigorous technical interview and screening process.
- **Mentored 50+** junior students in **Data Structures and Algorithms (DSA)** and Competitive Programming, driving a **20%** increase in average contest ratings across the cohort.
- **Spearheaded** the **Inception of Code (IOC)** initiative, facilitating weekly coding assignments and live doubt-clearing sessions for an audience of **200+** active participants.
- **Guided 10+** junior developers through the **Winter of Code** program by the **DotSlash Community**, providing one-on-one code reviews and debugging support to accelerate their project delivery.

Projects

VeriBounty | Code | React.js, TypeScript, Rust, Node.js, MongoDB **Jan 2026**

- **Architected** a full-stack decentralized application (dApp) on the Solana Devnet, managing smart contracts in **Rust (Anchor)** to securely process **500+** simulated fact-checking transactions.
- **Engineered** a **PDA-based escrow vault** system to lock staked SOL, automating **100%** of payout distributions to verified fact-checkers with zero fund leakage.
- **Developed** a RESTful backend using **Node.js**, **Express**, and **MongoDB** handling 100+ daily requests, integrating **Gemini Flash API** to pre-screen claims and reduce manual moderation time by **60%**.
- **Built** a responsive **React.js + TypeScript** frontend, integrating **@solana/wallet-adapter** to decrease user onboarding friction and transaction time by **30%**.

Codekick | Live | Code | React.js, Supabase, Next.js **Aug 2025**

- **Engineered** a full-stack web application serving **300+** incoming freshmen, streamlining their technical domain selection and early career mapping process.
- **Integrated** an AI-powered chatbot utilizing the **Gemini Flash API** that resolved **1,000+** domain-specific queries in real time, boosting user retention by **45%** and reducing manual support requests by **30%**.

AAVE Last Dance | Code | Next.js, Solidity, Ethereum, DeFi **Sept 2025**

- **Built** an Ethereum-based dApp utilizing **Solidity smart contracts** and **World ID** to provide privacy-preserving, Sybil-resistant identity verification for **50+** testnet users.
- **Integrated DeFi** collateral protection mechanisms, successfully simulating a **25%** reduction in unfair user liquidations during high-volatility market events.

Programming Achievements

- **Specialist** on Codeforces — Peak Rating: **1433**. Profile
- **3-Star** rated on CodeChef — Peak Rating: **1609**. Profile
- Solved **500+** problems on LeetCode, consistently strengthening algorithmic thinking. Profile
- Solved **1,000+** coding and algorithmic problems across multiple competitive programming platforms. Proof

Technical Skills

Programming Languages: C, C++ (proficient), Rust, JavaScript, TypeScript, Solidity, Java, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Next.js, Express.js, Anchor (Solana)
Blockchain & Web3: Solana, Ethereum, Smart Contracts, DeFi, dApp Development, PDAs, Wallet Integration
Databases & Tools: MongoDB, PostgreSQL, Supabase, Git, GitHub, Linux

Position of Responsibility

Organizing Committee Member — Web3 Hackathon, TantraFiesta '25

- Co-organized a 24-hour Web3 hackathon during the institute's annual technical festival, coordinating logistics and participant experience end-to-end.
- Provided hands-on **technical support** to **30+** participants on **blockchain architecture, smart contract development, and toolchain setup**, enabling **100%** of assigned teams to successfully deploy working prototypes before the deadline.
